Subject: Microsoft Settlement

I am sick and tired of the Federal government interfering with the free market. Microsoft is where it is because it makes and markets a better product! I was a diehard Netscape user but their product didn't keep up. The latest version was slow and hard to use. Not only was the Microsoft product better, it was FREE! Tell me how this hurt me as a consumer.

What does hurt me is the MILLIONS spent by the US government and various states in harassing Microsoft...an American success story! And what about the BILLIONS lost by stock holders and pension plans? Who are you looking out for???? Why do we punish success? That's un-American and hurts our economy. GET OFF THEIR BACK and start supporting US industry!

Sincerely,
Daniel Grantham, Jr.
